4. Learning Environment and Support

- 4.1) Please comment on the learning environment that impacted your experience in this module (for example, the Hub, video conferencing technology and discussion platforms if you are a student attending online. For students attending in person please also consider the lecture theatre equipment, rooms and facilities).
- Everything good as usual.
 - good
 - I liked how transparent she was about the assignment, I really got a feeling about her wanting us to do well.
 - I think that Ed stem wasn't very useful for this program, the teacher takes the time to reply to emails, in class as well and she even did late Q&A which is not often done by teachers. I truly think this teacher's lectures are super informative and relevant1
 - Learning environment was great.
 - The lecture halls have seatings far away from the screen. It was really hard to read the powerpoint on the screen.

5. Overall Feedback (Your responses are very valuable to instructors as these often highlight areas of excellence as well as of improvement).

- 5.1) What did you like most about this module?
- -Assignments, everyone had the independence to choose their own topic of interest in a dimension rich dataset
 - the time the teacher scheduled to answer questions, really helped to understand the topics better
 - broad coverage of a variety of topics in the healthcare field
 - I really appreciated the interactivity and how engaging and passionate the lecturer was.
 - Laure was a truly dedicated professor to helping her students, and really motivated me to do well in her class! She gave really great feedback and was always there when we needed it!
 - The assignment
 - The lecturer is very passionate about the topic and very approachable.
 - This module was clearly one of the most well taught in this master, the teacher is passionate and this is communicative.
 - Very practical, while getting to know how analytics is applied in a medial and healthcare setting
- 5.2) What would you most like to improve in this module?
- I do believe the slides need some rework (hence, the low score on 2.3). It often showed 4 different fonts, font sizes, font colours, bad graphics and weird ordering. at times it was hard to follow the lecture because of the disturbing slides, although the lecturer was on point with the verbal delivery.
 - Maybe she could be more oriented about the contents of our other courses.
 - Some people are inactive in class or too shy, might help to sometimes (for questions that are not open and to discuss about a topic) to have a survey
 - The lecturer. The support given is far more than any other lecture.
 - The lecturer often jump between the powerpoints, and it's a bit hard to follow.
 - This module is amazing
